SATURDAY EVENING, NOVEMBER 24.

CULINARY EDUCATION FOR GIRLS -Philadelphia has followed Boston and some other cities in introducing culinary educa tion for girls as a part of the public school course. Thirteen classes of twenty pupils each have been formed to begin with, and those interested believe that it will prove a great success. As was the case in that city when the introduction of sewing classes was proposed, the cooking classes have met with objections from a view, on the ground that other studies would be interfered with. But the great success of the sewing classes, which now comprise about 30,000 children, fully answers this objection. When will New York show like enterprise? It took years to make a beginning, even in manual training. If that is conceded to boys why not give the girls some practical aid toward making a living? They need it even worse than the boys. And what are public schools good for if not to be of practical benefit? The public was told recently that Greek had been added to the studies in the Normal school Men are being imported at salaries of \$10,000 a year to cook in this city, while the city is paying to leach girls Greek and refusing them instruction in sewing and cooking. This is not right. Nearly 2,000 girls are receiving instruction in the public schools of Boston in the science of cooking. It is an invaluable science. More people are injured by bad cooking than from any other cause. In Germany cooking schools are maintained for the wealthy and aristocratic. In New York they are needed for rich and poor. —New York News. Men are being imported at salaries

my 3 THE GOLD MINING COMPANY (location Music Mountains, A. T.) is as sound a mining enterprise as was ever placed on the market and he possibilities have never been exceeded. Every share should double in value within a year, and they may quadruple, as they are based on property that would ordinarily have been capitalized ten (10) times as great on account of its known richness and promise,

The shares are made small so that any one can invest. Subscriptions for five shares are as welcome as those for hundreds.

Every dollar of earnings will go to the stockholders in dividends, as there is nothing else that they can be used for.

A Wisewell mill, capacity 20 tons per day, with powerful machinery has been purchased and will be on the ground ready for erection at the mine within the next thirty days. The solid basis upon which the company is founded and the practical

proofs of the richness of the mine have already secured the confidence of the public, and the stock has steadily advanced in selling value Within the last few days bona fide sales have been made AT PAR.

There is no better stock on the market for a permanent investment For full information in regard to this Mine apply to the
